## Rolla Middle School Industrial Technology

Dear Parents,

Your child is currently enrolled in industrial technology. In this class, before students are able to work in the shop, they must pass all safety tests with a 100%. I want students to enjoy themselves in class but, I want them to do so in a safe atmosphere conducive to learning. After the safety unit has been covered, students will take a small refresher course on measuring using the English system.

Once finished with safety and measuring, the real fun can begin! Students will use the Parke System which is designed for middle age school students and their safety. The system will expose them to wide variety of different construction and industrial processes that will allow them to work with different types of materials such as woods, metals, ceramics, and plastics.

<i>Project</i>	<i>Cost</i>	<i>Project</i>	<i>Cost</i>
Yard Sign	\$12.00	Puzzle	Maple \$3.00
4-in-a-row	\$6.00		Walnut \$6.00
Chessboard	\$5.00	Sheet Metal Tray	\$5.00
Screwdriver	\$6.50	Candle	\$3.50
Pen Set	\$5.50	Checkers	\$4.00
Key Chain	\$1.00	Tool Box	\$9.00

Students should average three projects throughout the duration of the class. All projects must be paid for. Finally, checks should be made out to the Rolla Middle School.

I am looking forward to a safe and fun filled quarter with your son/daughter. If you have any questions or concerns then please, feel free to contact me via email at [znixon@rolla.k12.mo.us](mailto:znixon@rolla.k12.mo.us) or call me at school at 458-0120 ext. 12124. Thank you!

Sincerely,

Zack Nixon
